FOR IMMEDIATE RELEASE

Steele Solutions Highlights MODEX 2026 Booth Experience and Resources for Attendees

Booth highlights will feature Steele Solutions' advanced structural steel platforms, material handling chutes, and solutions designed to support next-generation warehouse automation systems.

MILWAUKEE, WIS (March 31, 2026) – [Steele Solutions Inc.](#), a North American leader in the design and manufacturing of complex work platforms, custom chutes, and automation systems, has announced its participation in [MODEX 2026](#) at the Georgia World Congress Center in Atlanta, Georgia. The event will take place April 13–16, 2026, and will bring together leaders across the supply chain, distribution, and warehouse automation industries.

Attendees are invited to visit Steele Solutions at booth #B15726, where the company will showcase its innovative structural platforms and chute solutions designed to support modern distribution and fulfillment operations.

“MODEX is an incredible opportunity for us to connect with industry partners, integrators, and end users who are shaping the future of warehouse automation,” said Kevin O’Neill, CEO of Steele Solutions. “We look forward to demonstrating how our structural platforms and chute systems help customers maximize space, improve efficiency, and support increasingly complex automation environments.”

What to Expect at Steele Solutions' MODEX 2026 Booth:

- **Advanced Elevated Structural Platforms:** Learn how Steele Solutions' engineered platform systems create space for automation equipment, work areas, and storage while minimizing structural interference and maximizing facility efficiency.
- **Slick Surface Technology (SST™) Material Handling Chutes:** See Steele's patented SST™ chute systems designed for smooth product flow, durability, and simplified installation with a welded, bolt-free frame.
- **Automation Support Solutions:** Explore how Steele Solutions partners with system integrators and automation providers to design structural systems that support robotics, conveyors, sortation equipment, and other advanced technologies.

- **Expert Consultations:** Meet one-on-one with Steele Solutions engineers and project specialists to discuss facility challenges and discover tailored solutions for optimizing operations.

Steele Solutions is known for its engineering expertise and dedication to manufacturing high-quality products in the United States. The company supports customers in e-commerce, retail, distribution, parcel handling, and manufacturing industries worldwide.

MODEX 2026 attendees can visit Steele Solutions' booth from Monday, April 13 through Wednesday, April 15 from 10:00 a.m. – 5:00 p.m., and Thursday, April 16 from 9:00 a.m. – 1:00 p.m.
